

Artofest Client Handbook

Introduction

This handbook provides a simple guide on how to use the ArtoFest system. It is designed for users with no technical background and explains how to navigate the application and manage its key features.

ArtoFest is a festival discovery and planning platform that allows users to browse festivals, explore locations, save favourites, and view related content such as streams. In addition to these user features, the system also includes an Admin Section, which allows authorised users to manage the content that appears within the application.

This handbook will guide you through:

- How to access and navigate the system
- How to use the main features of ArtoFest
- How to manage festival and stream data using the Admin Section
- Important actions such as creating, updating, and deleting records

All instructions are written step by step and supported with images to make the process as clear as possible.

Getting Started

To begin using ArtoFest:

1. Open the application in your browser or on your device
2. Use the navigation bar at the top of the screen to move between pages:
 - Home
 - Explore
 - Plan
 - Book
 - Stream
 - Profile
3. Click the **Profile** icon to log in or create an account

Once logged in, additional features become available, including the ability to save festivals and access the Admin Section.

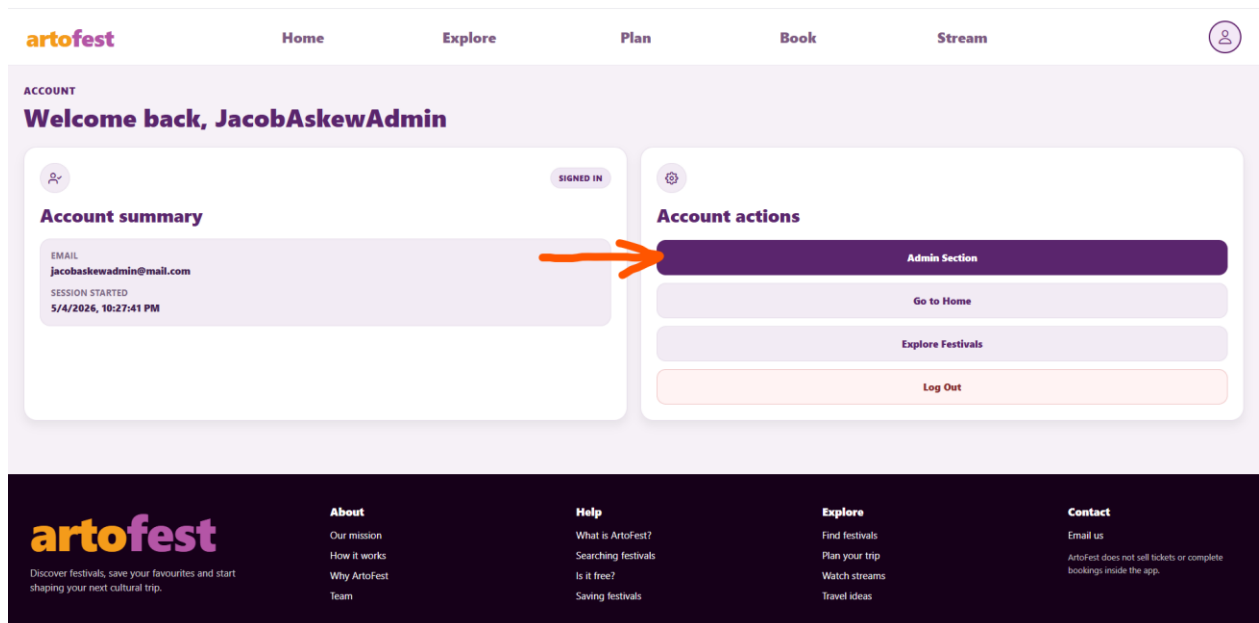

Important Notes

- The system is designed to be user-friendly and does not require technical knowledge
- Changes made in the Admin Section directly affect the content shown in the app
- Deleting items will permanently remove them from the system
- Always double-check information before saving changes

Admin Section

Accessing the Admin Section

Image 1: Profile page with Admin Section button

After logging in, the user is taken to the Profile page. On the right side of the page, under Account actions, there is a purple button labelled Admin Section.

To open the admin tools:

1. Log in to the ArtoFest account.
2. Go to the Profile page.
3. Click Admin Section.
4. The Admin Section page will open.

This button takes the user to the area where festival and stream records can be managed.

Admin Section Overview

Image 2: Admin Section main page

ADMIN

Admin Section

Manage festival and stream records through the API. This is a prototype admin interface and should later be protected with real role-based access control.

Start date
YYYY-MM-DD

End date

The Admin Section contains two main tabs:

- Festivals
- Streams

The Festivals tab is used to manage festival records.

The Streams tab is used to manage video or streaming content linked to festivals.

There is also a Refresh data button. This reloads the latest festival and stream information from the system.

Use this button after adding, updating, or deleting something to make sure the displayed list is up to date.

Country

Start date
YYYY-MM-DD

End date

On the left side of the Festivals section, there is a list called Existing festivals.

This list shows festivals that are already stored in the system. Each festival card shows:

- Festival name
- Festival ID number
- City and country

The Festival ID is important because the system uses it to identify which festival should be updated or deleted.

Important

When you click a festival in the display list, the form on the right automatically fills in with that festival's existing information.

This is useful because the client does not need to manually type all the details again. They can select a festival, change only the parts that need updating, and then submit the update.

Creating a Festival

Image 2: Festival form with Create selected

The screenshot shows the ArtoFest web application interface. At the top, there is a navigation bar with the 'artofest' logo and five tabs: 'Home', 'Explore', 'Plan', 'Book', and 'Stream'. A user profile icon is located on the far right. The main content area is divided into two columns. The left column, titled 'Existing festivals', contains a list of ten festival cards, each with a title, ID number, and location. The right column, titled 'Festival form', contains a form with several input fields and buttons. The 'Create' button is highlighted in purple, while 'Update' and 'Delete' are in light purple. The form fields include: 'Name' (Festival name), 'Art form' (Music, Film, Theatre...), 'City' (City), 'Country' (Country), 'Start date' (YYYY-MM-DD), 'End date' (YYYY-MM-DD), 'Month' (Example: May), 'Website' (https://example.com), and 'Latitude'.

To create a new festival:

1. Open the Festivals tab.
2. Click Create.
3. Fill in the festival form.
4. Enter the festival name, art form, city, country, dates, website, image link, description and other details.
5. Click Create Festival.

The new festival will then be added to the system and can appear inside the ArtoFest app.

Updating a Festival

Image 3: Festival form with Update selected

The screenshot shows the 'artofest' website interface. At the top, there are navigation tabs: Home, Explore, Plan, Book, and Stream. A user profile icon is in the top right corner. On the left, under 'Existing festivals', a list of festivals is shown, including 'Verbier Festival' (ID: 1), 'Animazys International Animation Festival - Agora' (ID: 2), 'Ars Electronica' (ID: 3), 'Avignon Festival' (ID: 4), 'Berlinale' (ID: 5), 'Eurocks' (ID: 6), 'International Festival of Ancient Greek Drama' (ID: 7), 'Manifesta' (ID: 8), 'Pink Apple Film Festival' (ID: 9), and 'Trame Festival' (ID: 10). The 'Festival form' on the right has three buttons: 'Create', 'Update' (which is highlighted in purple), and 'Delete'. The form fields are pre-filled with data from the selected festival (ID: 12): Festival ID (Example: 12), Name (Festival name), Art form (Music, Film, Theatre...), City, Country, Start date (YYYY-MM-DD), End date (YYYY-MM-DD), and Month (Example: May).

To update an existing festival:

1. Open the Festivals tab.
2. Click the festival from the Existing festivals list.
3. The form will automatically fill with the selected festival's details.
4. Click Update if it is not already selected.
5. Edit the details that need changing.
6. Click Update Festival.

This allows the client to quickly correct or improve festival information without re-entering the whole record from scratch.

Deleting a Festival

Image 4: Festival form with Delete selected

The screenshot shows the 'artofest' website interface with the 'Festival form' on the right. The 'Delete' button is now highlighted in purple. Below the form fields, a red warning message states: 'Deleting will permanently remove the selected festival record if the backend accepts the request.' At the bottom of the form, there is a large purple button labeled 'Delete Festival'.

To delete a festival:

1. Open the Festivals tab.

2. Click the festival from the Existing festivals list.
3. Click Delete.
4. Check that the correct Festival ID is shown.
5. Click Delete Festival.

The system displays a warning because deleting a festival can permanently remove it from the database.

Only delete a festival if you are sure it should no longer appear in ArtoFest.

Streams Display List

Image 5: Streams tab

The screenshot shows the ArtoFest web application interface. At the top, there's a navigation bar with 'Home', 'Explore', 'Plan', 'Book', and 'Stream' tabs. The 'Stream' tab is active. Below this, there's a sub-navigation bar with 'Festivals' and 'Streams' tabs. The 'Streams' tab is selected. The main content area is divided into two sections. On the left, under 'Existing streams', there's a list of stream cards. An orange arrow points to the first card, 'FAN Network Symposium - European Animation'. On the right, the 'Stream form' is displayed with fields for 'Festival ID', 'Title', 'URL', 'Platform', and 'Category ID'. The 'Create' button is selected in the form's action bar.

The Streams tab works in a similar way to the Festivals tab.

On the left side, there is an Existing streams list. Each stream card shows:

- Stream title
- Stream ID
- Platform, such as YouTube or web
- The festival it belongs to

When the client clicks a stream in the list, the stream form automatically fills in with that stream's current information.

Creating a Stream

Image 5: Stream form with Create selected

The screenshot shows the 'artofest' web application with the 'Stream' tab selected. On the left, under 'Existing streams', there is a list of stream entries with their IDs and associated festivals. On the right, the 'Stream form' is displayed with the 'Create' button highlighted. The form fields include Festival ID, Title, URL, Platform, and Category ID.

Update Stream

To update an existing stream:

1. Open the Streams tab.
2. Click the stream from the Existing streams list.
3. The form will automatically fill with the selected stream's current details.
4. Click Update.
5. Change the title, URL, platform or category if needed.
6. Click Update Stream.

This is useful if a video link changes or the stream information needs correcting.

Deleting a Stream

Image 7: Stream form with Delete selected]

The screenshot shows a web interface for managing streams. On the left, under the heading "Existing streams", there is a list of four stream entries, each with a title and a unique ID. The first entry is "FAN Network Symposium - European Animation" with ID 12. The second is "Public meeting with Tiago Rodrigues" with ID 13. The third is "Logbook Performance" with ID 16. The fourth is "Long live the topic!" with ID 15. On the right, the "Stream form" is displayed. It has three buttons at the top: "Create", "Update", and "Delete". The "Delete" button is highlighted in dark purple. Below the buttons, there is a "Stream ID" field with the value "Example: 8". A red warning message states: "Deleting will permanently remove the selected stream record if the backend accepts the request." At the bottom of the form is a large dark purple button labeled "Delete Stream".

To delete a stream:

1. Open the Streams tab.
2. Click the stream from the Existing streams list.
3. Click Delete.
4. Check that the correct Stream ID is shown.
5. Click Delete Stream.

A warning message is shown because deleting a stream can permanently remove it from the system.
