

ARTOFEST: Festival Discovery and Planner Service

Team: Jacob Askew . Idowu Adeleke . Favour Akuchie . Paul Oko-Jaja

Project Overview

ARTOFEST is a web-based platform that helps users discover festivals and plan their experiences with ease. Users can search and filter festivals, view detailed information, create personalized itineraries, and save their favourite events. The system aims to promote local and international festivals while providing an intuitive planning tool that enhances user engagement and simplifies festival attendance/

System Components

FRONTEND INTERFACE

Built with React and Tailwind CSS to deliver a responsive and interactive user experience across devices.

BACKEND API

Developed with Node.js and Express.js to handle business logic, requests, and secure communication with the database.

DATABASE LAYER

Uses PostgreSQL to store festival, user, itinerary, and preference data with structured relationships and data integrity.

AUTHENTICATION

Implements secure user registration and login using JWT for session management and route protection.

KEY FEATURES

Discover Festivals

Search and filter festivals by location, date, category, and more.

Plan Itineraries

Create custom itineraries by adding events to your personal schedule.

Save Favourites

Save favourite festivals and events for quick access later.

Interactive Map

View festival locations on an interactive map and get directions.

Notifications

Receive updates and reminders about upcoming events and itinerary plans.
